Detailed Action

Response to Amendment

1. Applicant's appeal brief filed 2-22-2005 has been entered and carefully considered.

The amendment is sufficient to overcome the obviousness rejections of claims 1-7 since the previously applied prior art combination of Choi, Tratz and Nollet fails to teach the structural limitation of a coarse screen located upstream from an air separator having a zigzag shaped duct.

Prior Art of Record

2. The prior art of record and not relied upon is considered pertinent to Applicant's disclosure. In addition, the following references are cited for disclosing various aspects of Applicant's invention: US 5,184,780.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: With respect to claim 1, Choi and Nollet in combination teach the claimed apparatus except for a coarse screen located upstream from an air separator having a zigzag shaped duct. While Tratz a waste disposal system that uses a residue sorting device in the form of a sieve to divide waste residue into a fine, finer coarse and coarser coarse material, having incorporated the sieve into the apparatus collectively disclosed by Choi and Nollet such that the sieve is located upstream of an air separator having a zigzag shape would not have been obvious to one of ordinary skill in the art at the time of invention.

Additionally, US 5,184,780 to Wiens teaches a solid waste disposal system that includes a screen (34) followed by an air separation system (40). The air separation system is not identified as having a zigzag configuration. Claims 2-7 depend on claim 1 and are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
